

Press Shift+F1 and point to a control to learn more about that control.

The chart preview responds to the new settings that you enter in the dialog.

1. When you leave the dialog with OK, the settings are applied permanently.
2. When you leave the dialog with Cancel or Escape, the chart returns to the state when you opened the dialog.

For a 3D chart you can choose **Format - 3D View** to set perspective, appearance and illumination.

Perspective
